DATA SYSTEMS

PROGRAMMING

As soon as possible

Remote or at the office in Cologne, Germany

You will build a data and dashboarding system which brings together financial, marketing and sales data.

ABOUT  carbonminds

Carbon Minds offers data, consulting and training focused on environmental sustainability for chemicals and plastics. Major multinational companies use our data and services to set or reach environmental targets.

We are a rapid growth company with an out-sized impact in our industry. Our diverse team of scientists, business leaders and communicators are working to ensure an evidence-based sustainability transition for chemicals and plastics.

RESPONSIBILITIES

- Closely collaborating with management to identify relevant indicators for financial performance, sales, and marketing
- Designing and developing dashboards and reports
- Organizing current data structures and driving forward data system harmonization
- Using Python to combine different data sources
- Researching market data and best practices for a high-growth startup
- Supporting monthly accounting activities

JOB REQUIREMENTS

- Master level student in Industrial Engineering, Business Administration, Finance, Computer Science, or Business Information Technology
- **Mandatory experience:** basic knowledge of Python
- **Preferred experience:** basic knowledge of BI tools and systems
- **Languages needed:** proficiency in English, German is a plus
- **Soft skills:** good communication skills for interactions with other team members

BENEFITS AT CARBON MINDS

- Startup culture and understanding a business in the sustainability field
- Simple and fast personal improvement with a high learning-curve and varying tasks
- 16-20 hours per week with flexible working hours / potential for partly remote working
- We are seeking long-term relationships, so we can grow together
- Competitive salary based on a fixed salary structure that accounts for your experience
- Last but not least: **Doing good for the environment!**
